CinemaShop® Custom Crafted Home Theater Interior Design Process:

1) **CinemaShop® Custom Theater Interior Estimate:** Contact us and the CinemaShop® Design Team will create a free informal non-binding price estimate (price within plus or minus 10%) with just some basic information from you. We need a desired theme, basic room dimensions, screen size & location and speaker type & location information before we can estimate your project. This serves as a pre-construction price guide to creating your perfect custom home theater interior.

2) **CinemaShop® Theater Interior Proposal:** The CinemaShop® Design Team will create a formal proposal based on your selected theme - including an advanced 3D room layout of your design, with more complete information from you. We need your desired theme, exact room dimensions, room diagram (preferably blueprints, or the like), exact screen size & location, plus exact speaker type & location information before we can create your proposal. This offers exact pricing for your custom home theater interior design project. Proposals are valid for a period of 1 month, so first obtain an Estimate from us, until you are ready to purchase your CinemaShop® Custom Crafted Home Theater Interior. **Cost: \$300**
